transfer films
for metal decoration

since 1994

DECOTRANS ALU REVOLUTIONARY CONTENTS

Decotrans Alu is a high-definition printed polyester film designed for decorating aluminium **by means of a sublimation process that** ensures resistance to atmospheric agents and wear and tear.

A quality certified product, its book of 4000 available designs **and the** four designers dedicated **to meeting our customers' needs, make it is the ideal** support tool for architects and interior designers **for embellishing any aluminium surface.**

DESCRIPTION

Transfer polyester film for finishing of pre-painted aluminium with polyurethane and polyester powder

SUPPORT

film thickness
19, 21 or 23 µm

roll width
1620/1860mm

core diameter
75 mm

roll diameter
180/215 mm

roll length
750/1000 m

weight
max 50 kg

PRINTING

In rotogravure using solvent based inks

APPLICATION SYSTEMS

It is possible to apply the product with both flat presses and oven. Sublitex standard transfer parameters for quality control laboratory and production, are:

	SURFACE METAL TEMPERATURE
FLAT PRESS	200°C (+/- 3°C)
OVEN	185 – 205 °C

Our "QUALIDECO" is approved for external use, in the combinations design-colorway/powder as attached to the data sheet n°1 and its subsequent amendments. Any changes must be prior notified, and only if approved by our laboratories, will be included in the list of products suitable for outdoor use. If these guidelines are not followed, Sublitex disclaims any responsibility for the misuse of its products and QUALIDECO brand.

QUALITY AND R&D

Internal quality controls are carried out, particularly through comparative tests of application and evaluation of color rendering and decorated surface by a direct comparison with master sample (production standards)

WARNING! *It is important to follow the detailed instructions for proper application of all elements of decoration from the proper cooking of the bases (see powders' supplier data sheet).*

technical information

QUALITY AND R&D

It is possible that there are color differences on the rolls between different production lots without having color differences on the sublimated product

LABORATORY TESTS

Raw materials, semi-finished products are controlled by:

FT-IR-ATR (Infrared Spettroscopy)

GC-FID / HS-GC (Gaschromatography)

TLC-CCD

DURABILITY TESTS

Durability test by accelerated ageing (Xenon Test) according to ISO 16474-2 of sublimated products on to aluminium profile (phospho-chromate) painted with Qualicoat approved powder

colorimetric coordinates (CIE-LAB) and gloss after 1000 (2000 for Class 2) hours of exposure (ΔE) with intermediate checks every 200-250 hours

contrast between exposed area and the reference sample, evaluation greyscale (ISO 105 A-02)

visual appearance after 1000 hours exposure (2000 for Class 2)

STORAGE

Keep in a dry and ventilated place, protect from heat and sunlight

PRODUCT EXPIRY DATE

1 year in the above-mentioned conditions

PACKAGING

Cardboard boxes

NOTICE AND ADVICE

Sublitex is not responsible for any unusual applications nor for improper storage of the product
